### Post 2:

Get to know the next big (smaller) thing that's been decades in the making.

Novum Wall *[tag @novumwall]* is the result of more than 20 years of earth retention research, solution development and testing, and real-world application.

Here's Novum by the numbers:

- Dimensions: 46 1/8 in x 20 in (plus face texture) x 9 in (1172 mm x 508 mm [plus face texture] x 229 mm)
- Area: 2.88 sq ft (0.27 sq m)
- Weight: ±600 lbs (±272 kg)

Give your customers large block performance with small block convenience. Contact us today to learn more about Novum Wall or visit:

<https://novumwall.com> [or manufacturer's NW webpage address]

### Post 3:

Novum Wall [tag @novumwall]: Everyone's Favorite Wall Solution.

Novum Wall offers swift and straightforward installation, guaranteeing you enjoy the most efficient process from start to finish. Its compact size and manageable weight allow you to use compact equipment like skid-steers and mini-excavators to install everlasting retaining walls even in the most confined areas.

Even in the face of labor scarcity, volatile transport costs, and demanding project requirements, wall designers and installers can give project owners the dependable, great looking segmental retaining wall (SRW) solution they need.

#### **Post 4:**

Novum Wall [tag @redirockinternational], an intelligent and flexible wet cast Segmental Retaining Wall (SRW) solution, will revolutionize your approach to slope retention, erosion control, terracing, and grade management.

Novum Wall is ideal for gravity walls up to 6 ft (1.2-1.8 m), meaning it's just as effective at preventing erosion for a property on an inland lake as it is maximizing space in a residential backyard.
